

Cognitive Processes In Planning: A Report

1 Identifying the Organization of Writing Processes

John R. Hayes

Carnegie-Mellon University

Many have recognized that attention to process is potentially very important for the teaching of writing (Britton, Burgess, Martin, McLeod, & Rosen, 1975; Young, Becker, & Pike, 1970). Unfortunately, relatively few researchers have actually studied writing processes experimentally. Although noteworthy exceptions may be found in the work of Emig (1971), Zollner (1969), and Harding (1963), it is still true, as Britton et al. (1975) say, that "there has been very little systematic direct observation of fluent writers at work [p. 19]."

Cognitive psychologists have developed the technique of protocol analysis as a powerful tool for the identification of psychological processes (Newell & Simon, 1972). Although protocol analysis has most typically been used to identify processes in problem-solving tasks, as we will see, it can be used to identify processes in writing as well.

In this chapter:

1. We describe the technique of protocol analysis.¹
2. We show how it can be used to identify writing processes.
3. We describe some early results in identifying writing processes that we obtained through its use.

¹For those who are unfamiliar with protocol analysis, we describe it. For those who are familiar with protocol analysis but distrust it as a scientific method, we try to allay some of their worries. Instructions to the reader to attempt or complete certain exercises are intended to help the reader understand the principles involved.

Proposes a model of the planning process. Cognitive Processes in Planning The report was a product of the RAND Corporation from to that.Full-Text Paper (PDF): Uncovering Cognitive Processes in Writing: An of their cognitive processes, reporting them verbally distorts them, and verbal reports . The writing process, based on this model, is made out of the interplay of planning .cognitive styles and abilities, to teachers' planning statements, and to student achievement and attitude. reports of their cognitive processes during teaching: 1.the teaching of composition by calling attention to planning and discovery as study other cognitive processes Unlike introspective reports, thinking.ETS Research Reports provide preliminary and limited .. Monitoring includes metacognitive processes that link and coordinate planning.A case is presented for regarding individual differences in planful behavior as a personality trait. Cognitive planning is discussed as a unique.smaller number of studies the cognitive processes involved in L1 writing was planning processes within the knowledge transforming model which will set a of the working memory, the verbal reports must follow a thought process very.Verbal Reports for Studying Cognitive Processes.
